Meilenstein 1	12.03.20	12.03.20	Alle	
Präsentation MS 1				
About a Game 20 Outline of the game with its goals, rules and mechanics				
About a Game (advanced) 5 Have a very clear and well thought out concept of your game				
Ahead of Schedule and Under Budget! 10 You have already started producing relevant code for your project.				
Dear Diary 5 Project diary exists and is readable				
Dear Diary (advanced) 5 The diary has at least one meaningful entry				
Mockup 5 Show a mockup of your game during the presentation				
Networking 10 Overview of the functionality of client and server				
Requirement Analysis 10 Overview of the software requirements (not required software)				
The Name of the Game 5 Have a name for your game, ideally also for your group				
Who? What? When? 15 Project timeline and responsibilities				
Who? What? When? (advanced) 10 Have a detailed and well thought out project plan				
Server/Network Architektur	03.03.20	11.03.20	Manuela	
Grundaufbau Server / Client Struktur				
Alle Informieren sich über die Grundlagen zB. mit dem Masterkurs Client_Server-Programmierung mit Java (gesendet)				
Übungsstunde 03	18.03.20	18.03.20	Alle	

Vorgang	Anfang	Ende	Verantwortlich
Server/Client Communication  Call Me Bob 5  Players can change their nicknames	12.03.20	24.03.20	Guillaume
Chat 15 Client to client chat is working			
Login 10 Arbitrarily many clients can log on to the server			
Logout 5 The server handles a client logout in a meaningful way			
Ping 10 A ping message is regularly sent from server to client and processed meaningfully (connection losses are detected and handled)			
Pong 10 A ping message is regularly sent from client to server and processed meaningfully (connection losses are detected and handled)			
Protocol Code 10 The human-readable network protocol is defined and documented in the source code			
Protocol Validator 15 Network protocol is being used correctly			
QA Concept 10 Reasonable Software Quality concept			
bob_001 5 The server assures that player nicknames are unique and changes duplicates in a consistent manner by assigning appropriate names			
whoami 5 The client suggests a nickname based on the system username			
Netzwerkprotokoll	12.03.20	18.03.20	Guillaume, Rohan
Protocol Code 10 The human-readable network protocol is defined and documented in the source code			
GitIgnore-File  There is a gitignore file containing entries relevant for major operating systems and the used tools	10.03.20	13.03.20	Rohan
Protokoll Dokument  The human-readable network protocol is defined in a dedicated document	19.03.20	22.03.20	Guillaume

#### Vorgänge

Anfang Verantwortlich **Ende** Vorgang

/\*\* ... \*/ 10 Source code is sufficiently documented

About a Game 5

Outline of the game with its goals, rules and mechanics

Broadcast to all clients across all games and lobbies is working and has a dedicated command

The build script succeeds and produces an executable jar & javadoc for the task "build-cs108"

Command Line 5

Command line parameters are parsed correctly: (client <hostadress>:<port> [<username>] | server <port>)

Dear Diary 10

Project diary is up to date and filled with meaningful entries

Present a working prototype of the game in the presentation

**GUI 15** 

The chat is available via a basic GUI

There is a way to list open, ongoing as well as finished games. Their status is indicated

Game Logic 25

The main logic of the game as well as its fundamental mechanics are present and the game is playable

Game State 10

Game state is kept on server

Use at least one external library besides JUnit. JavaFX does not count as an external library.

Lounging 10

Have support for multiple lobbies (one per game) with their respective internal chats

There is a way to list all players currently connected to the server

Progress Report 15

How things are going - project timeline and responsibilities, changes and problems

Protocol Code 10

Network protocol is completely defined and documented in source code

Protocol Document 5

The definition of the network protocol in the external document is up to date

Present your QA measures which can also be found in the updated document

QA (advanced) 10

Vorgang	Anfang	Ende	Verantwortlich
Have a well thought out and detailed written QA concept and a solid and realistic plan on how to implement it. If possible, have a first result of your metrics.			
Rules to Code 5 How is the gamestate and game logic represented in the code			
Shall We Play a Game 30 Present a working prototype of the game logic in the exercise slot by playing the game (Terminal or GUI)			
Technology! 10 Describe tools, libraries and processes which you use that are not introduced in the lecture and why you use them			
Whisper 5 Whisper-chat between two clients is working			
Who? What? When? 10 Update and adjust your project plan for milestones 4 and 5			
Übungsstunde 08	22.04.20	22.04.20	Alle
Unit Tests	16.04.20	26.04.20	Guillaume, Rohan
Unit-Test 5 All relevant features of a core component of your game are tested			
Unit-Test (advanced) 15 Unit-Tests are sufficient and meaningful			
Full GUI	13.04.20	28.04.20	Janni, Guillaume, Manuela
Verfeinerung Design Drag n Drop Geometrie (Perspektive)			
Gradle Tests	29.04.20	03.05.20	Alle
Feinschliff	04.05.20	10.05.20	Alle
Testing	29.04.20	13.05.20	Alle

Vorgang	Anfang	Ende	Verantwortlich
Meilenstein 4	29.04.20	29.04.20	Alle
/** */ 10 Source code is sufficiently documented			
5 out of 7 5 You will receive the playable .jar from two other groups. Assess all MS4 achievements which pertain to the game for these two groups. Handin procedure specified on Slideset 06 and via Mail after MS4.			
Dear Diary 10 Project diary is up to date and filled with meaningful entries			
GUI 20 The game is represented graphically			
GUI (advanced) 30 The game is fully playable from the UI. Text input is only used where absolutely necessary.			
High Score 5 There is a high score list which is stored persistently, updated when needed and availble for clients			
Peer Precision 5 Your assessment of the other games matches our assessment with a deviation of at most one achievement			
Referee 15 The rules of the game are checked and enforced correctly			
Shall We Play A Game 20 Present the working game in the excercise slot by playing the game			
Unit-Test 5 All relevant features of a core component of your game are tested			
Unit-Test (advanced) 15 Unit-Tests are sufficient and meaningful			
Victory! 10 The winner and the win state is correctly determined			
Übungsstunde 09	29.04.20	29.04.20	Alle

14

#### Vorgänge

**Anfang** Verantwortlich **Ende** Vorgang

/\*\* ... \*/ 15 Source code is sufficiently documented

About a Game 10

Outline of the game with its goals, rules and mechanics

About a Game (advanced) 10

Have a clear introduction to your game explaining its fundamentals in such a way that a firsttime listener can understand it

Architecture 15

Have documentation outlining the overall program architecture

Your repository contains an outreach/ folder with the specified content

Command Line 5

Command line parameters are still parsed correctly

Dear Diary 10

Project diary is up to date and filled with meaningful entries

Demo! 35

Have a bugfree demo of the game in the final presentation

The GUI works without any errors and all client functionality is accessible by it

Game Logic 15

The entire logic of the game as well as all its mechanics are present and the game is fully playable

High Score 10

There is a high score list which is stored persistently, updated when needed and shown when requested

Login 5

Arbitrarily many clients can still log on to the server

The game and/or team has a proper Logo

Manual 10

There is a manual which describes how the game is to be played

Pachydermatous Librarian 10

All external libraries in your project are managed by gradle via maven central

Picturesque 10

Have a representative screenshot of the game

Final version of network protocol is completely defined and documented in source code

Protocol Document 5

The final version of the network protocol is current in external documentation

15

#### Vorgänge

**Anfang Ende** Verantwortlich Vorgang

Results of Quality Assurance measures and lessons learned from them

QA Report 15 QA report with goals, methods and results

QA Report (advanced) 15

Detailed and relevant analysis of QA measures over time, discussion of results, well-written report

Shall We Play A Game 35

Present the working final game in the excercise slot by playing the game

Technology! 10

Describe tools, libraries and processes which you use that are not introduced in the lecture and why you use them

Technology! (advanced) 15

Use at least two libraries besides JUnit actively for a significant / impactful task in your project. JavaFX does not count.

Twitchv 5

Have a representative video showing somewhere between 20 seconds and 2 minutes of gameplay

Unit-Test 10

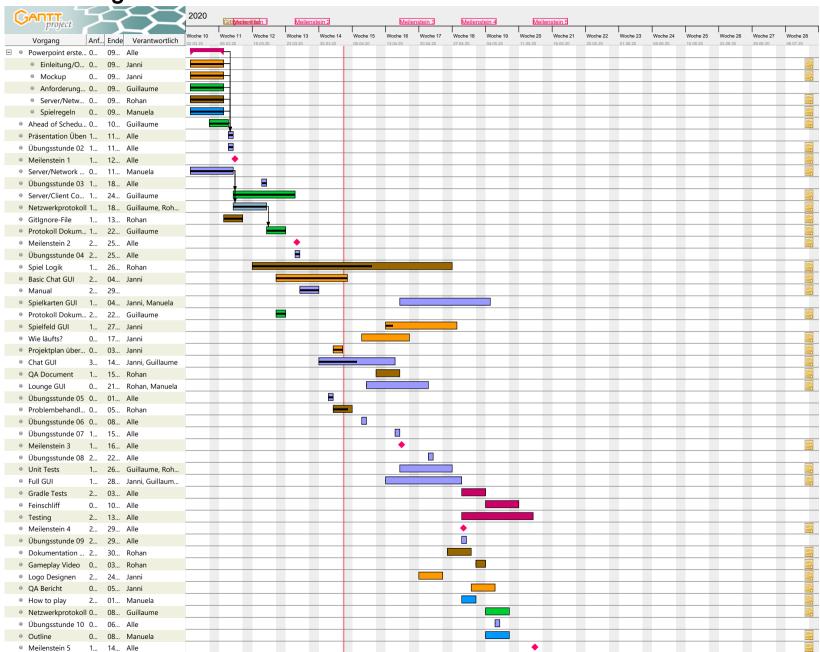

All unit-tests are meaningful and 'green'

We Are Smarter Now 20 Lessons Learned
